## OVERVIEW:

New Media artist marries traditional art/animation skills with next-generation digital media software.

4+ years of experience in a variety of interactive venues using a multitude of design styles tailored to the needs of the individual client:

- Children's interactive edutainment games
- Corporate and small business website/intranet design
- Sales and promotional CD-Rom presentations
- Business Deliverables – PowerPoint and Word Templates, letterhead, business card, logos
- History of adding value to any design team through talent, communication, and teamwork
- Proven ability to lead a team of designers to create a unified look and feel throughout all phases of any given project

Chris is currently searching for challenging work with a company that takes its media seriously. Always looking for opportunities that will allow him to further enhance his design skills and continue to develop new skill-sets.

## TRAINING:

### Joe Kubert School of Cartoon and Graphic Art -

Successfully completed 2-year program oriented towards principles and application of Classic and 3-D animation

### South Puget Sound Community College -

Drafting and Auto-CAD oriented program, with highlights in Programming Logic and MS DOS

### Theocratic Ministry School -

Ongoing public speaking program focused on the teaching of bible principles and their application to everyday life.

### Army Basic Training -

Completed with honors the eight week course focusing on self-discipline, communication, fitness, and teamwork.

## FREELANCE:

**Paul's Subaru** - Wolcott, CT - <http://www.pauls-subaru.com>  
When ex-racetrack mechanic Paul Johnson bought his own garage and auto body shop, he turned to me to build him a site that carried the feel of a Subaru professional without stealing Subaru's logo or artwork.

**Riverview Thai Restaurant** - Spokane, WA -  
<http://www.riverviewthai.com>

Working to increase the presence of the #1 Thai food restaurant in the Spokane area, I have created their web site, and art for their marquis sign, billboard advertisements, menu, letterhead, and business cards.

**BerkshireHiking.com** - Danbury, CT - [www.berkshirehiking.com](http://www.berkshirehiking.com)  
With the tight budget of a startup, the owner of Berkshire Hiking, a site detailing the many outdoor wonders of New England, needed a quick, very inexpensive makeover for his site. He needed it to be versatile, and easy to implement without my involvement past the initial design.

**Coprindm Corporation** - Newtown, CT  
When the CEO of ISO Health Care Group decided to leave the company he started many years ago and start on his new dreams, he dragged my colleagues and I along with him kicking and screaming to work on the corporate identity pieces for his new ventures, and is looking to us to design and build his new web presence and multimedia sales presentations when he is ready.

**Sci/ Art** - Hendersonville, NC - <http://www.KaliszInColor.com>  
World Class color expert, Katherine Kalisz needed a series of technical illustrations on the science and relationships of color and light for her book *Understanding Your Color: A Guide to Personal Color Analysis*. Based on the quality of the illustrations supplied, she chose to have me also do the book cover and redesign her web site.

**ISO Health Care Group** - Westport, CT  
When the CEO of ISO needed high quality corporate presentations developed to help him sell a multi-million dollar concept to prospective investors, he turned to my associates and me for the job. Using a mix of Flash and HTML, he had four separate presentations at his fingertips that he could present seamlessly and alter the order of as needed.

## EMPLOYMENT:

**Microcast, Inc.** - Danbury, CT - Dead and Gone  
As one of the resident Multimedia Artist / Animators, I set the design standards for the fully functional mini- web sites used by the player of the world's largest streaming media company (before it closed). I also contributed work to the corporate web site and intranet.

**Funnybone Interactive** - Canton, CT  
As a senior Animator / Artist, I produced character animation and design, background art, and interface development for various Children's Educational Software titles and online shockwave games. Among the various imprints I created media for are, JumpStart, Fisher Price, Knowledge Adventure, and Blaster.
